

Creating a project in Keil-MDK

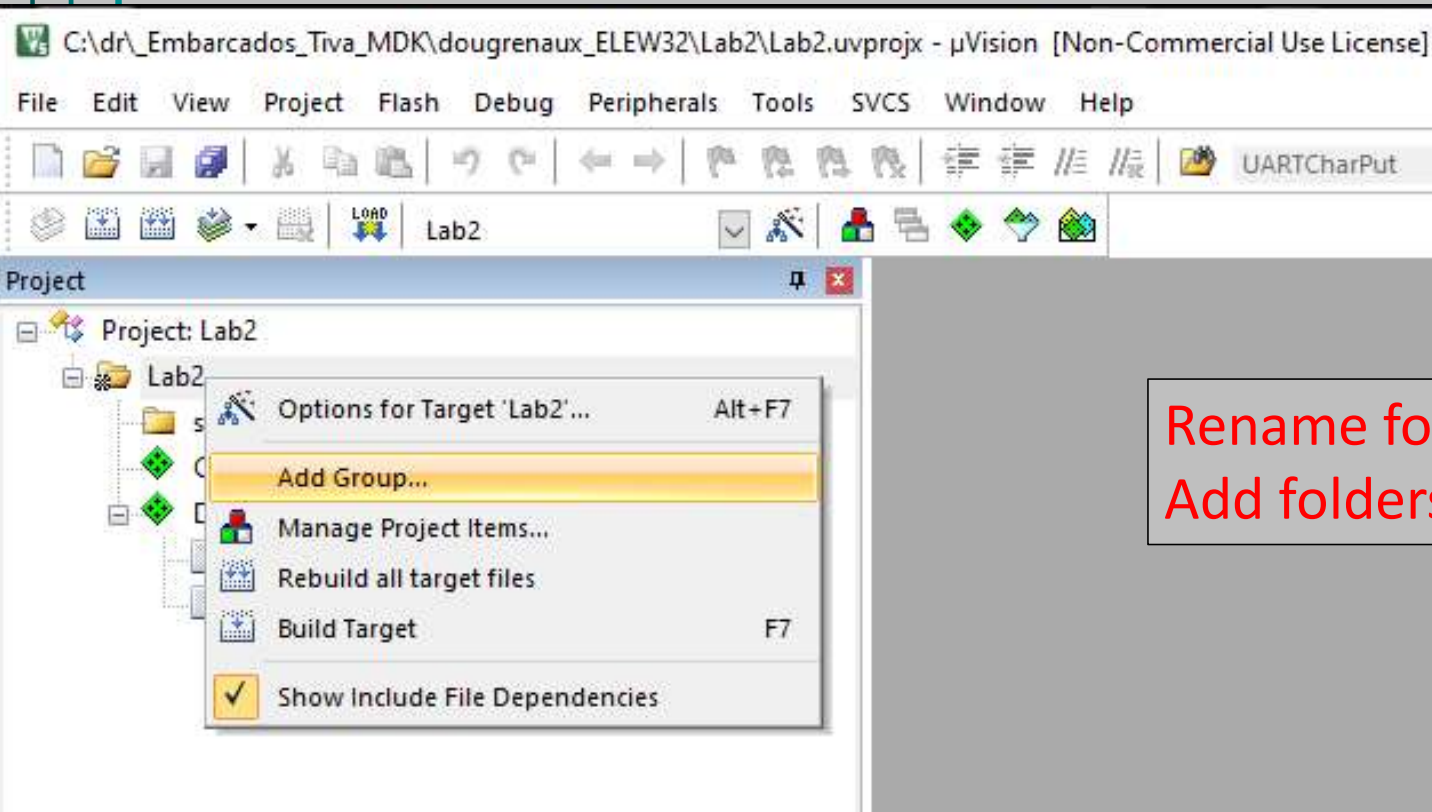

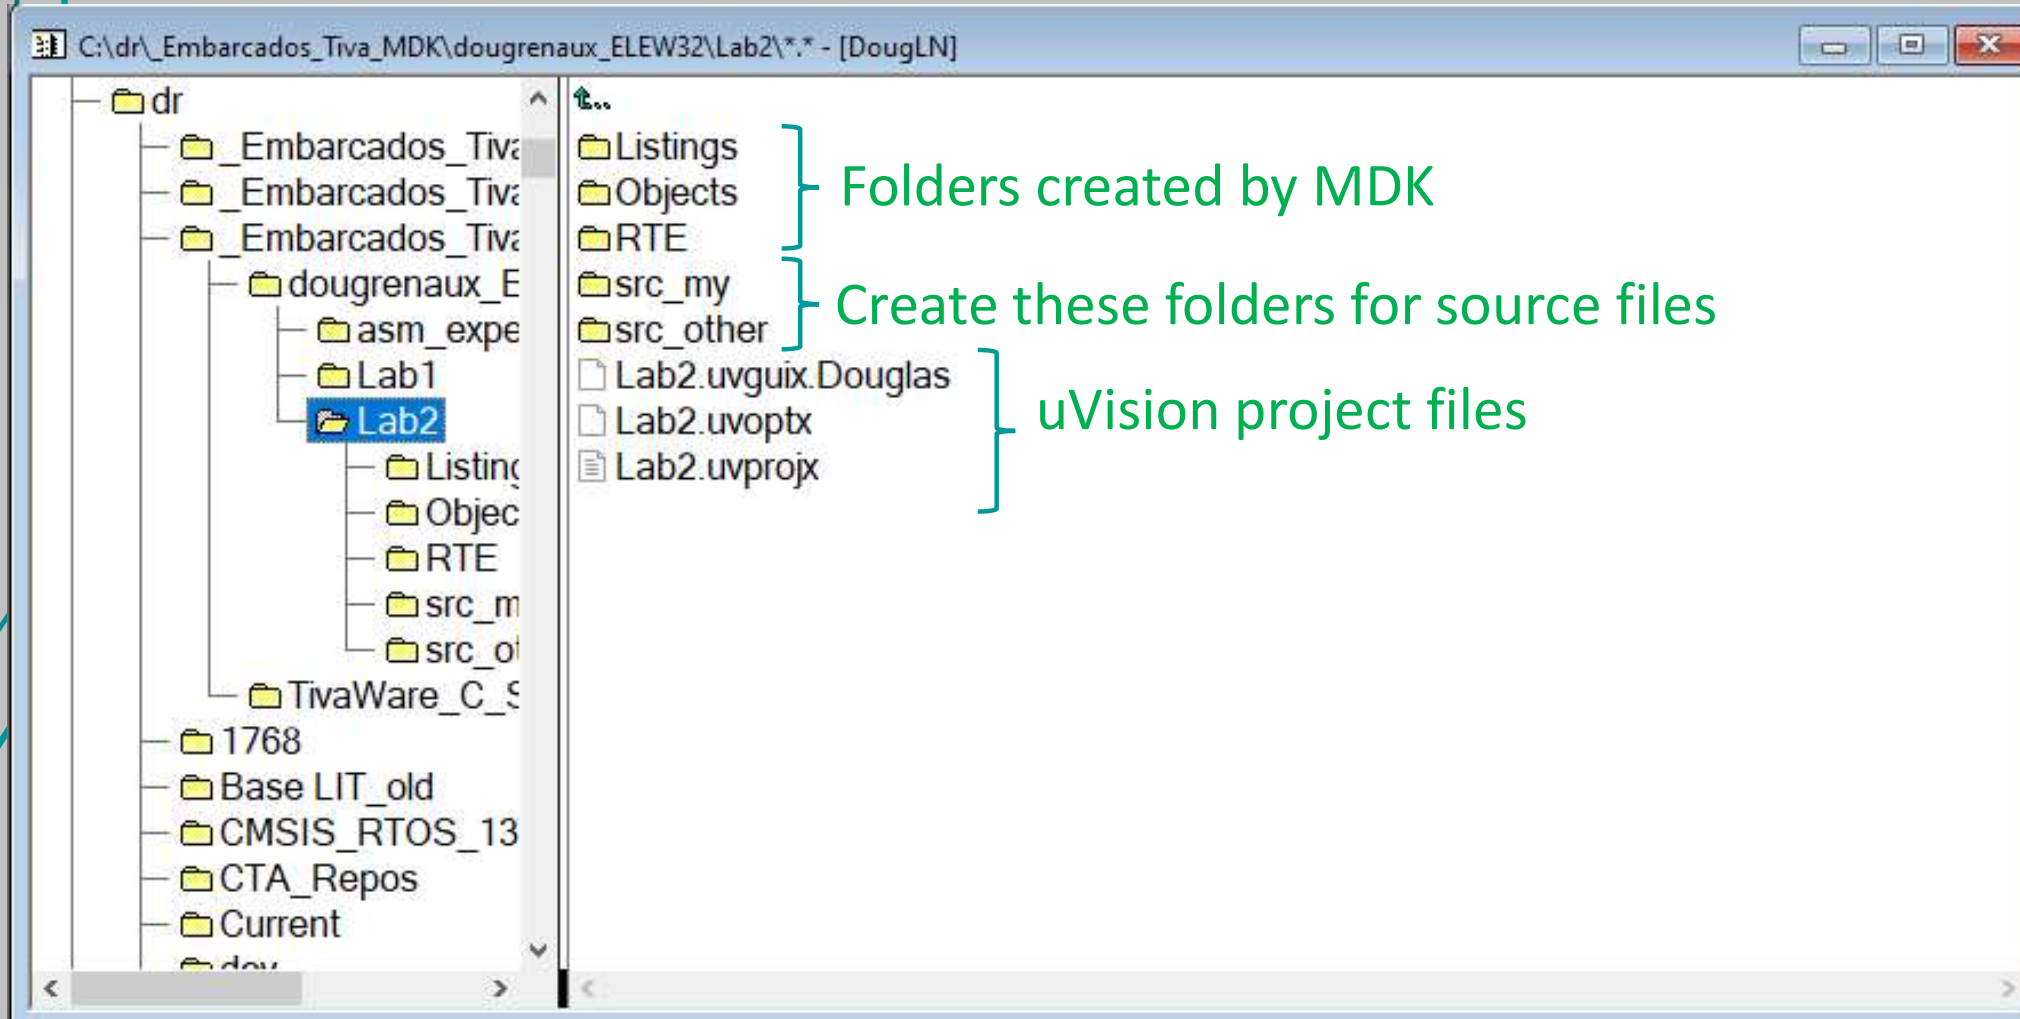

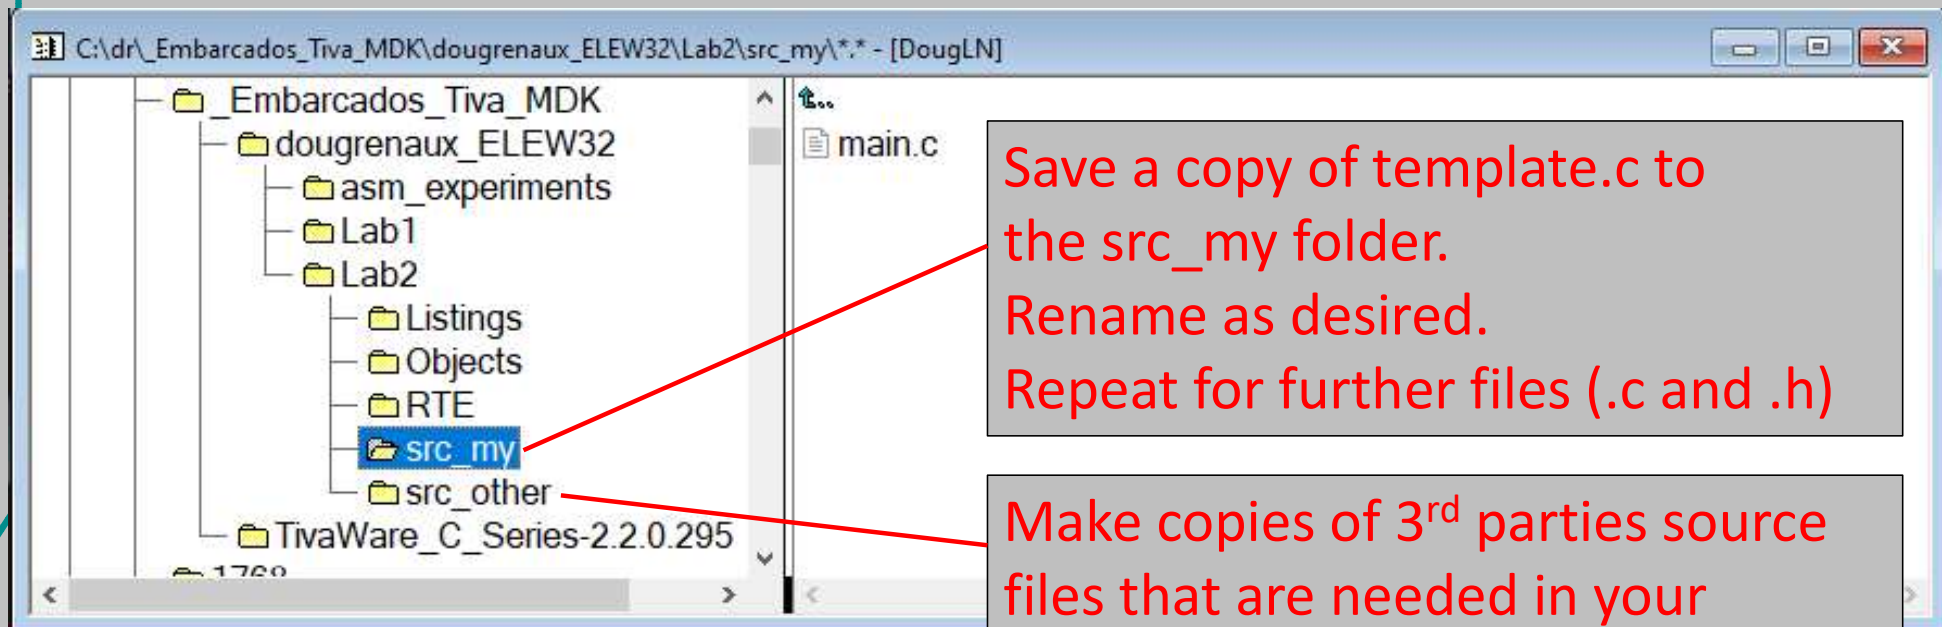

Include all SW components that are relevant for this specific project.

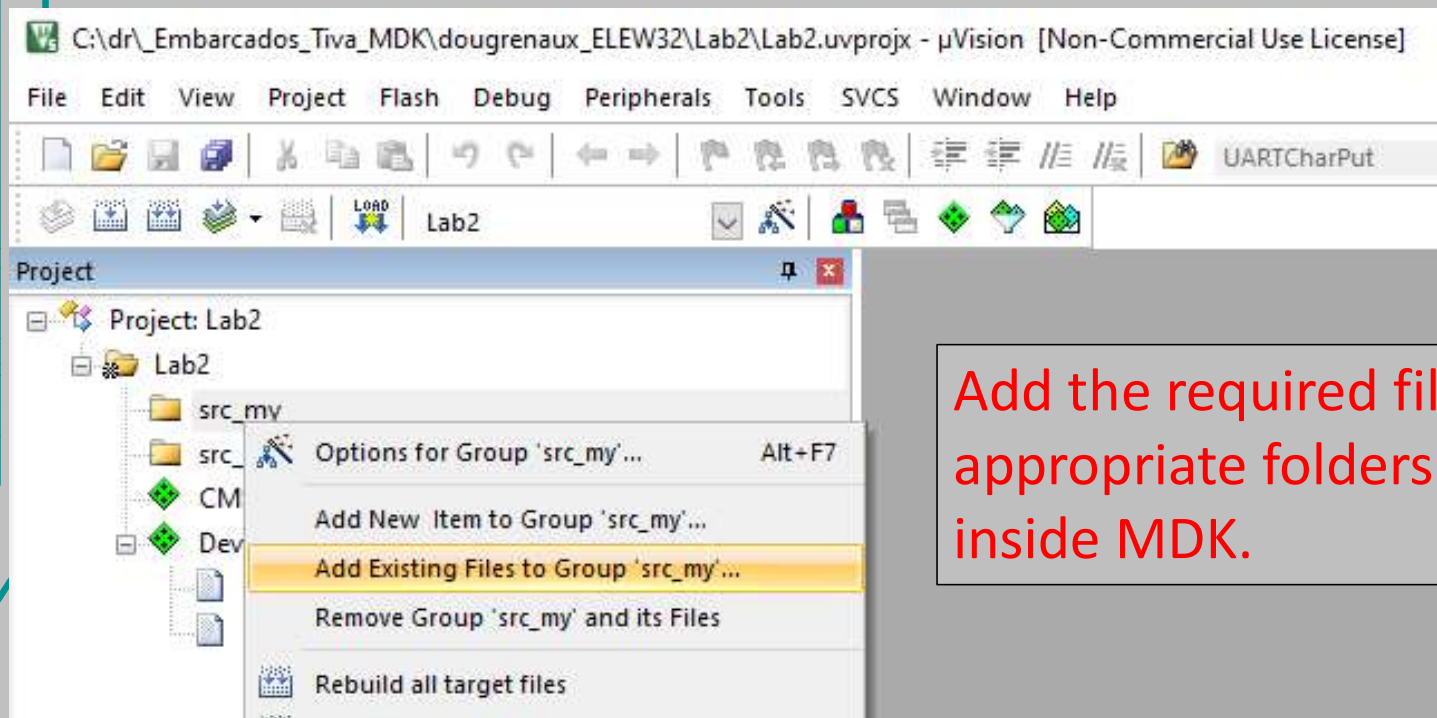

Rename folders as desired.
Add folders as needed.

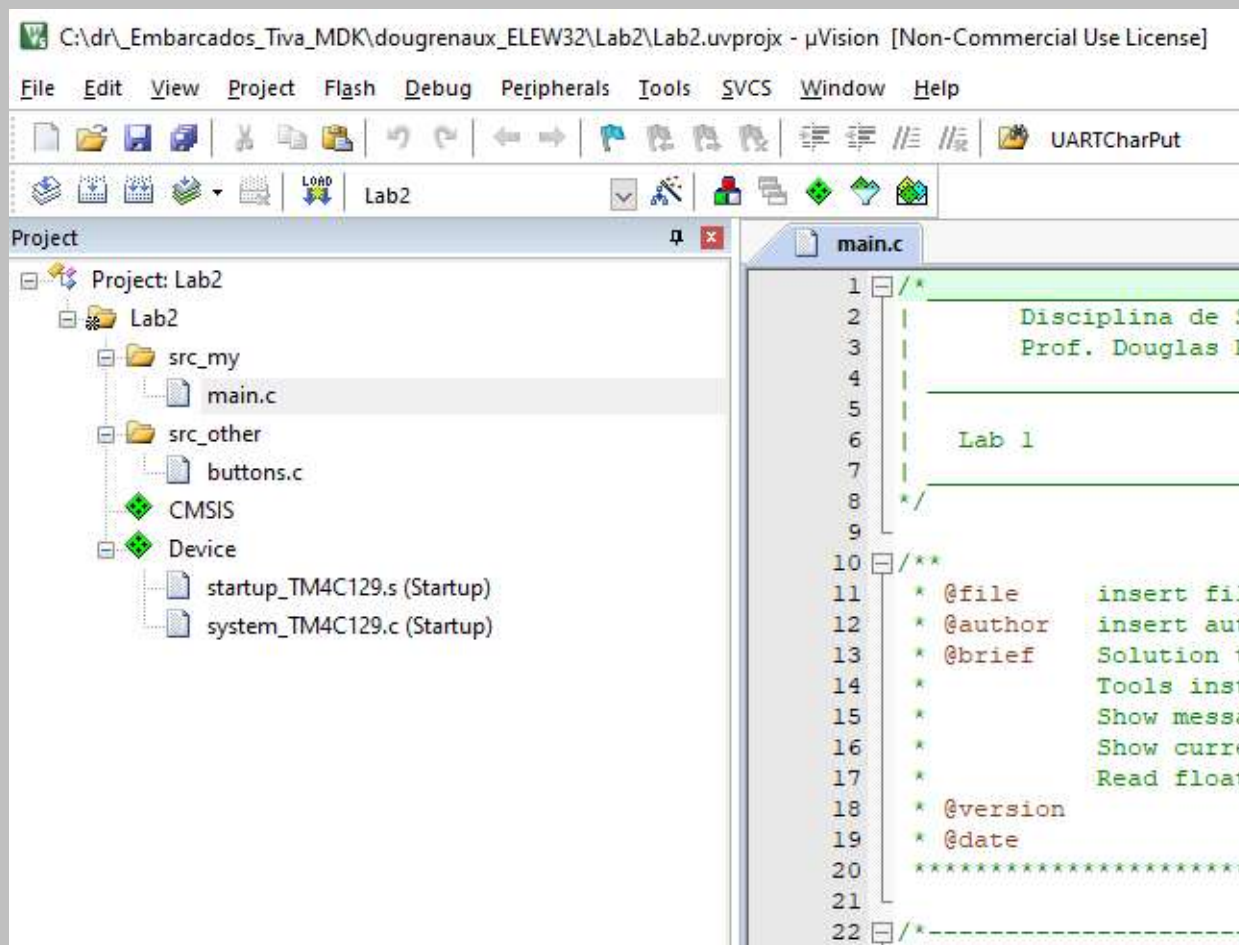

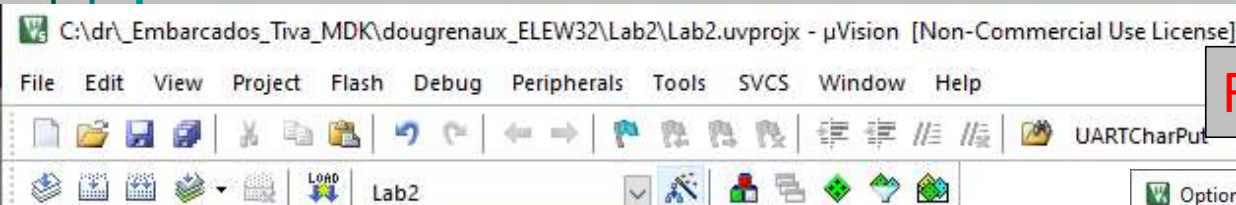

Save a copy of template.c to the src_my folder.
Rename as desired.
Repeat for further files (.c and .h)

Make copies of 3rd parties source files that are needed in your project and will not be modified.

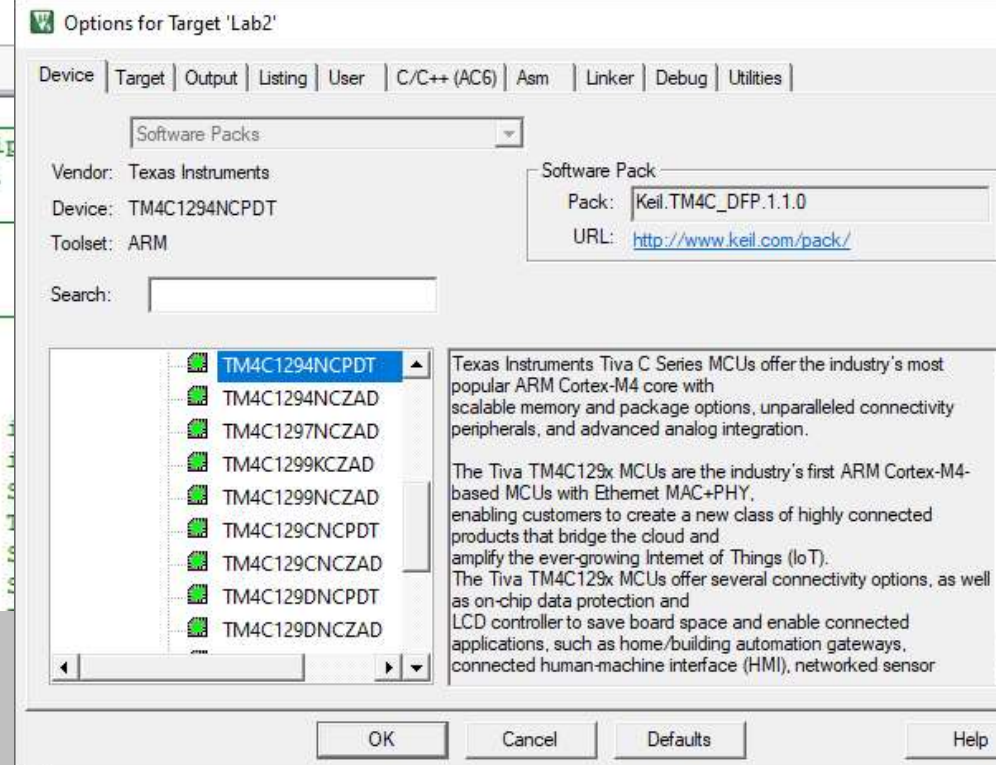

Add the required files to the appropriate folders in the project inside MDK.

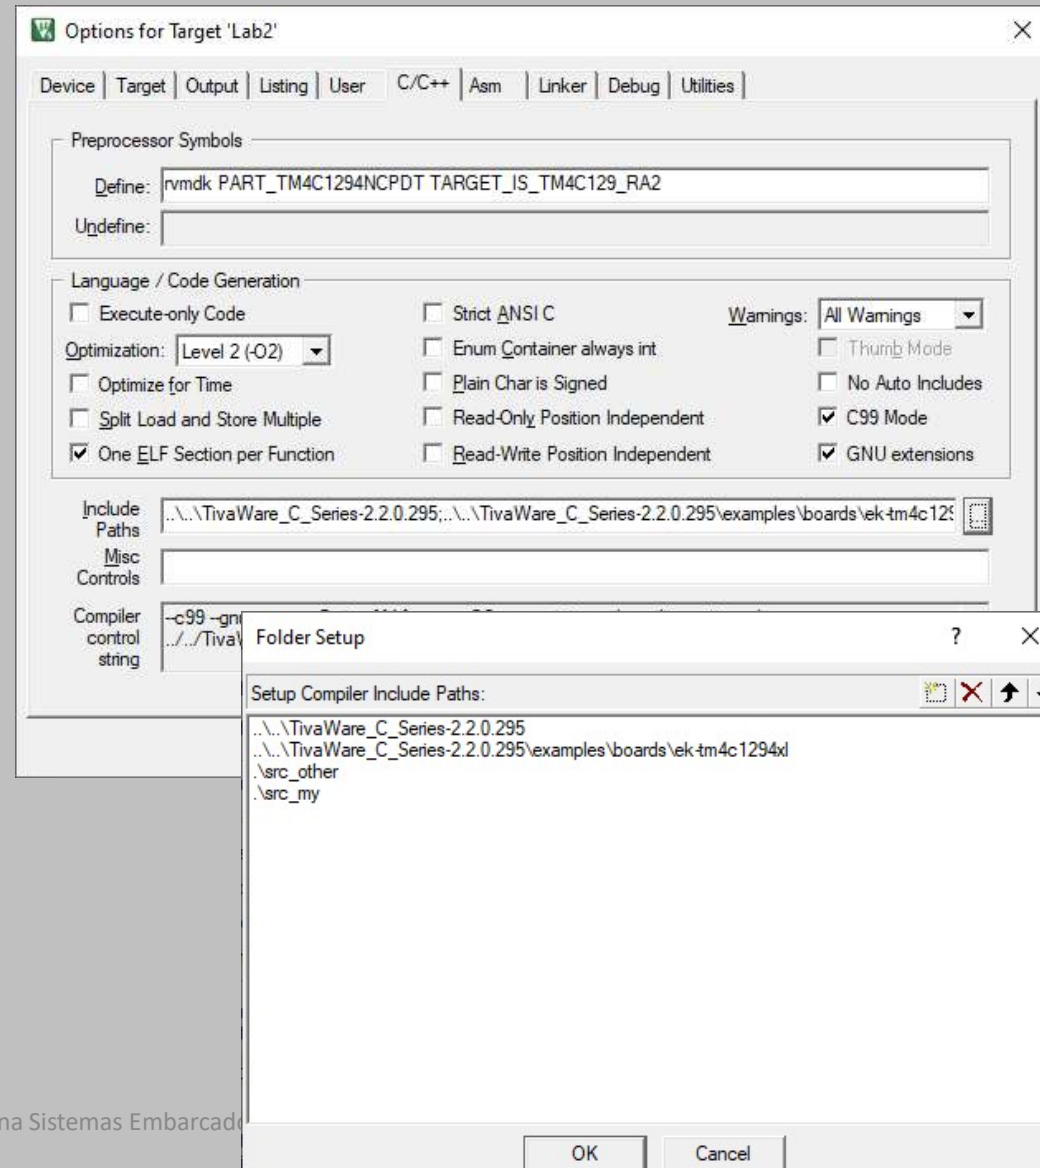

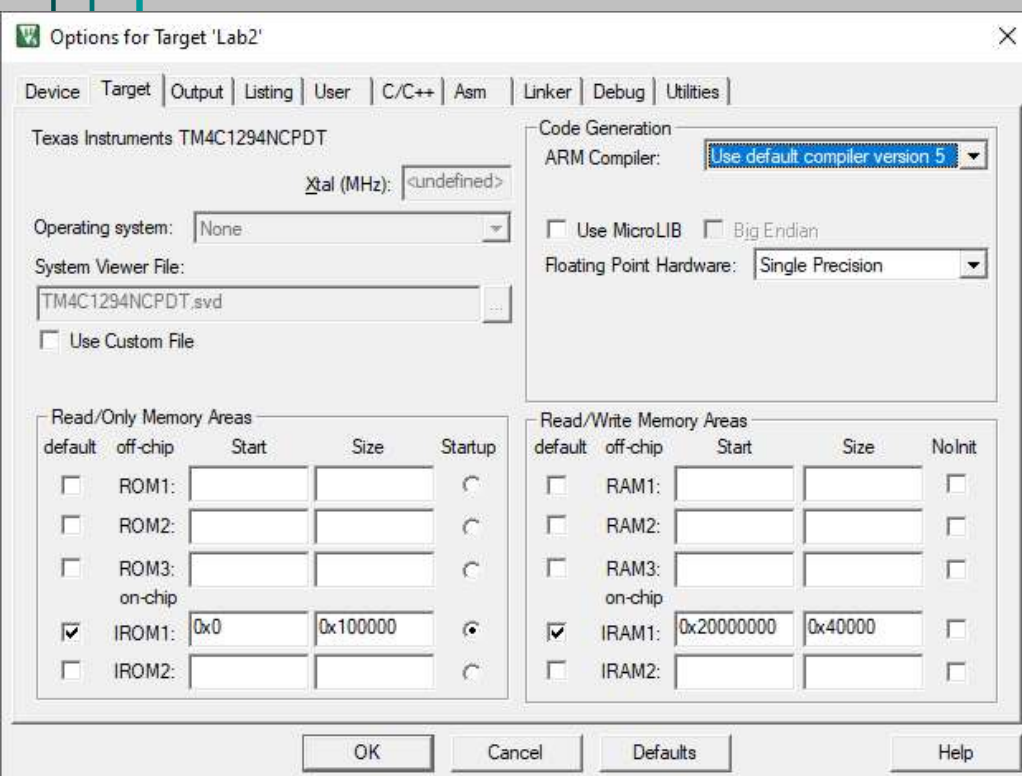

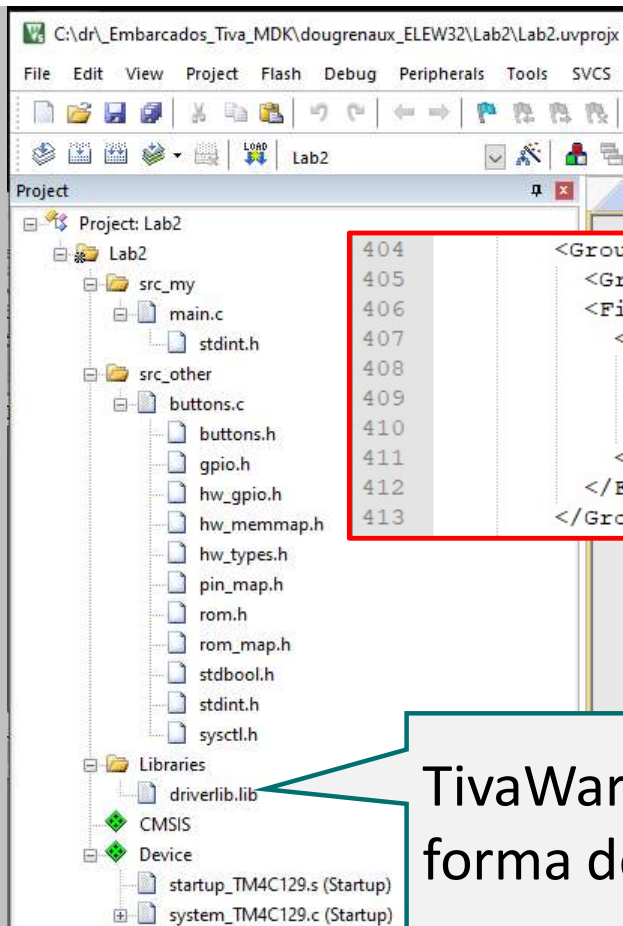

Review the project options !

Options for Target...
Configure target options

Rem: only some of the options windows are shown.

TivaWare incluído na forma de biblioteca.

Este é o conteúdo do arquivo Lab2.uvprojx

Notar que o caminho para driverlib.lib é relativo. Isto é fundamental para que este projeto compile corretamente em outros computadores.
